

Following the death of a parent death and learning I got something they did not jealous siblings filed malicious false accusations. They could have been easily disproved.

Unfortunately lawyers and the courts became involved resulting in 3 years of protracted litigation. I was forced into probate litigation and a two day trial. I received court orders that were unrecognizable.

They were corrupt beyond anything I could ever have imaged. As a matter of fact they were so corrupt I knew the transcript would be altered. Therefore I ordered tapes of the trial first and then the transcripts. The very word I knew would be changed was changed. It was necessary to justify a sham trial and the corrupt orders. I can attest to the corruption that is rampant at the Hillsborough County Probate Court under the direction of Judge (NAME OMITTED). It is a for profit business to benefit the legal community and "friends of the court". Unnecessary court appointments are funded through court ordered theft.

The same controversy brought me before the Hillsborough Superior Court. Another sham trial and thousands of dollars were spent to benefit the legal community. I received the typical corrupt biased court orders from another corrupt judge (NAME OMITTED).

I inform everyone I possibly can if you think you have a legal problem do not call an attorney and NEVER enter a NH courtroom. I probably would not believe my own if told to me prior to my personal experience. To my regret I mistakenly hired a corrupt attorney (NAME OMITTED) to protect my interests in my inheritance. My misfortune became his small fortune. I intend to make my story public knowledge and I will expose the so-called officers of the court who stole from me just because they can.

I have learned I am not an isolated case in the un-civil courts of NH. People who know me and all I have endured are very disturbed knowing it could happen to them.
