

I work for a lawyer in Nashua. We recently have noticed that paperwork filed with the Probate will not get logged in on the day it is delivered. One Friday at 2:15 I hand-delivered some paperwork that had a 10-day count before a hearing. The next week we discovered that they did not log it in until Monday, meaning our 10-day count did not start on Friday as we thought. This ended up costing our client more money, because they had to reschedule airline flights. I do not understand why the Court does not log things in when received--it is inexcusable.
