

I have tried to make my points without overburdening you with documents. As you review this material, questions should arise. I will provide any document you wish to review. What I have provided is only the tip of the iceberg. I strongly suggest a complete review of my two Rule 11 Petitions to the state Supreme Court, which I can provide upon request. A full review of the petitions will reveal numerous violations of rules of law. The axiom that you cannot cover-up a lie with a lie is evident throughout.

Also, I will be pleased to submit my full correspondence, which I sent to Governor Lynch, Attorney General Ayotte and the Executive Council during the past year.

I would like to work with you and add any input you request. I am sure once you review this information, you will realize the important changes to the administration of justice you can effect in this state. Please keep in mind that the commission is not limited at what it can look at or how long it can look at it². When the state Supreme Court deliberately overlooks serious violations of the law, the public is at risk, the public has a right to know, and the public should expect that a commission representing their interests would look into the matter and would respond accordingly, even if it could result in a request for the Chief Justice and others to resign. The issues are that strong.

Very truly yours,

A handwritten signature in black ink, appearing to read "David H. Coltin". The signature is fluid and cursive, with a long horizontal stroke extending to the right.

David H. Coltin

² Chief Justice Broderick, Manchester Listening Session.
