

1. My experience with the state courts have included jury duty and working out the custody of my two children.
2. If I were looking for information on the state courts, I would probably ask my friends, family, co-workers, or search online.
3. I do not know much at all about how the state courts operate.
4. I am very concerned about the expense of going to court. I was prepared to pay what I had to do settle my own matters, but it would have helped have an estimate.
5. I don't know what the different challenges are that the state courts face today. I believe that funding is an issue.
6. I have heard neither strikingly positive nor strikingly negative about the courts.

Comments: I would like to know the court structure and what the different purposes each type of court serves.

Thank you.
