

don't have to support me in my golden years.

What is the most negative thing you have heard about the state courts?

My ex-wife and I still talked when we seperated. She told me that when she went for her first meeting with her lawyer he stood up and congratulated her and told her that her ship had come in. At the time she still had some feelings for me and was very upset. Child support guidelines are not realistic, and encourage parents economicly to seek divorce.

Additional Comments:

The laws stress doing the right thing for the kids. Giving their mother more money and time is depriving them of their father and does not accomplish this purpose.
